be opened at once. Specialists in Home Industries should be brought from outside and the institution converted into a College. The Chamarajendra Technical Institute affords ample scope for both theory and practice to go hand in hand. When this is done, Government may also consider whether supervision should vest with the Industries and Commerce Department or the University authorities.

First Member of Council.—The improvement of the Institution and provision of advanced courses are under the consideration of Government and will be dealt with in the Orders on the Educational Memorandum. In our present financial position, it is not possible to affiliate the institution to the University; it has to develop much more before this can be done.

SUBJECT No. 103.

Establishment of additional Colleges.

Messrs.(1) H. Krishna Sastry, Krishnarajpet Taluk and (2) G. Murigappa, Gubbi Taluk.

Mr. H. Krishna Sastri.—At present, there are only two Colleges in the State. Students from rural parts find it very difficult to get seats in these Colleges. For want of seats in the particular groups which they wish to take up, they will have to take up any group that is available and their progress is thus marred. Students who not unfrequently fail to secure seats in any group are compelled to take up appointments. Much more so will be the case in the years to come. To obviate these difficulties, the Collegiate High Schools at Shimoga and Tumkur must be raised to the standard of Colleges. Also two more Colleges may be established soon.

First Member of Council.—According to the Unitary System of the Mysore University Scheme, this is not possible since all the Colleges should be in one and the same place. The University cannot exercise proper supervision if Colleges are scattered throughout the State. Necessary arrangements will be made to admit more students by providing increased accommodation.

Mr. Krishna Sastry.—Accommodation in the Mysore and Bangalore Colleges must be increased. For want of seats, classes are held in the morning for second year students of the Entrance Class with little or no benefit to them. The recent increase in the number of seats is not sufficient. There are many cases of Mathematics students having to take up History and so on.

First Member of Council.—Government have sanctioned more teachers and more sections to provide for a large number of students who were at first

refused admission. As far as possible, every student who seeks admission into the Colleges and Schools will be admitted and until permanent arrangements can be made, temporary arrangements have been sanctioned to carry out this policy.

SUBJECT No. 104.

Establishment of Collegiate Classes in all High Schools.

Messrs. A. Naraniengar, Hassan Taluk; Mahommed Raza, Hassan Municipality and K. T. Seshaiya, Belur Taluk

Mr. K. T. Seshaiya.—Collegiate High Schools may be established at all District Head-quarters where there are no such schools, and suitable facilities may be created in the matter of providing accommodation for all the students in the Collegiate classes.

First Member of Council.—Wherever a definite number of students say 25 or 30 are forthcoming, additional classes will be opened, and in course of time, Collegiate High schools will be opened in all the District Head-quarter towns.

Mr. S. Venkatesaiya.—In Bangalore and Mysore, High School classes contain 4, 5 and sometimes 8 sections since all students from rural areas flock to these schools. The reason for this is that schools in the rural parts are not as efficient as those at Bangalore and Mysore Cities. If all schools are made to stand on an equal level of efficiency, any minimum that may be fixed can be had. This really will be the case and we should not be surprised if, in the course of a few years, instead of in every district head-quarter town, College classes will have to be opened in every taluk head-quarter.

First Member of Council.—Government will be glad to open such classes when necessary. As regards the quality of the existing schools, I may say that the improvement of all High Schools in the State is engaging the special consideration of the Inspector-General of Education.

Mr. Narayana Chetty.—The Anglo-Vernacular School at Davangere was raised to a High School but the accommodation remains the same. The amount of inconvenience felt by the students can well be realised. A contribution of Rs. 15,000 has been paid for extensions to the present building as also for a hostel. But nothing has yet been done in this direction.

First Member of Council.—The work will be started early.
